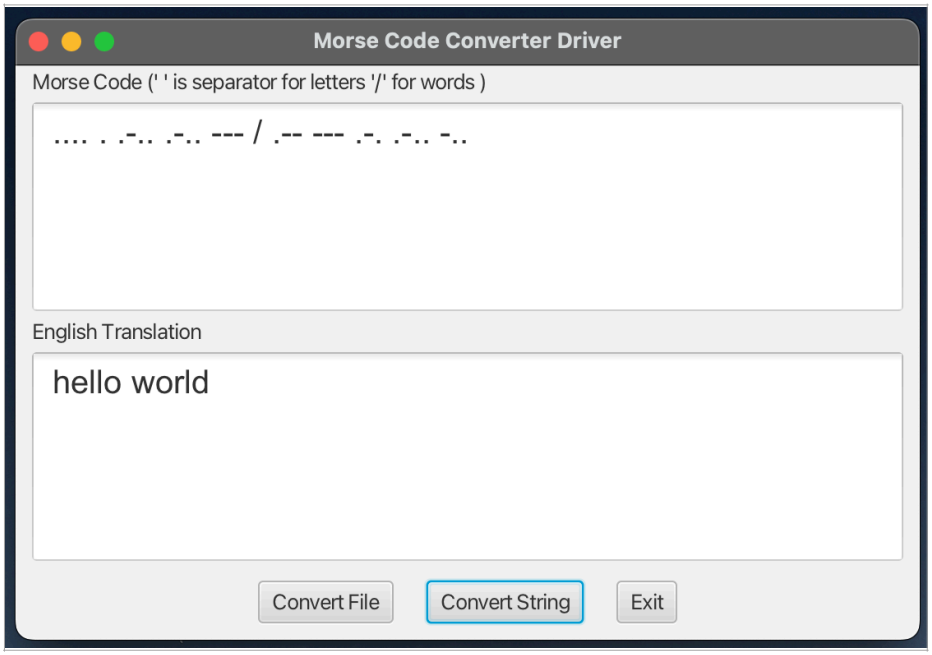
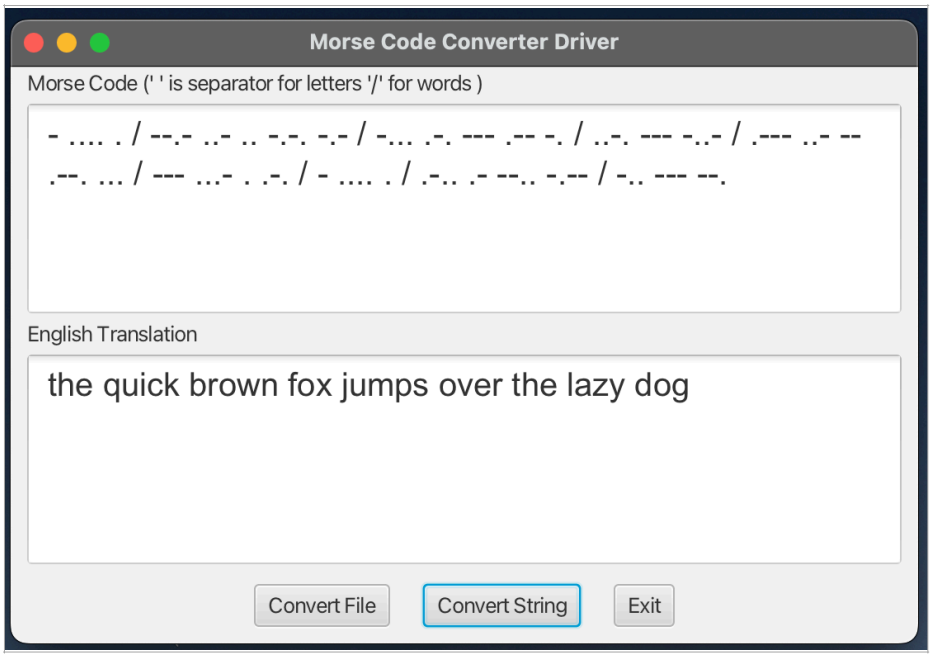
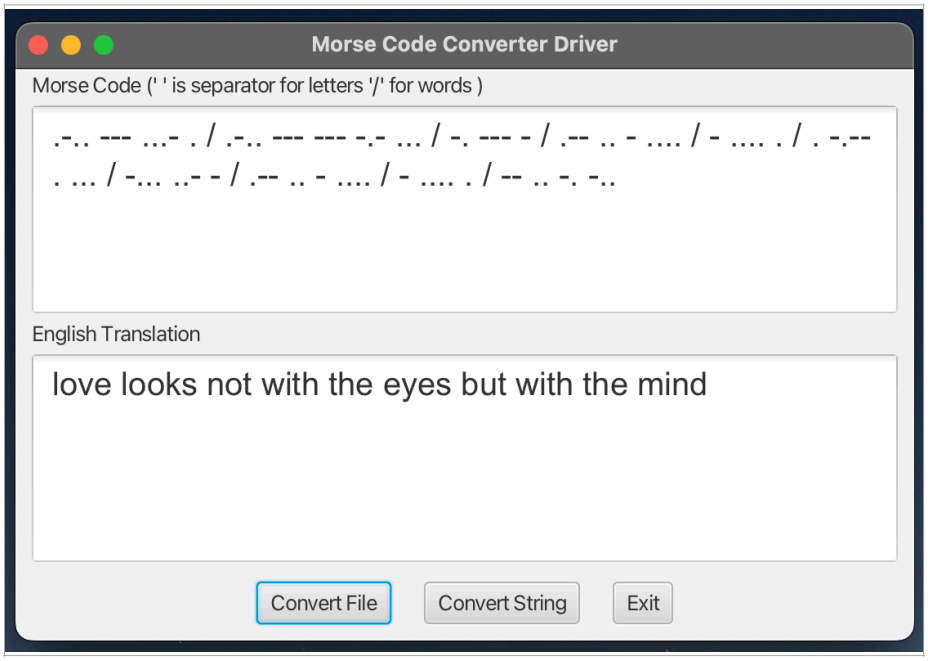
Test Runs:



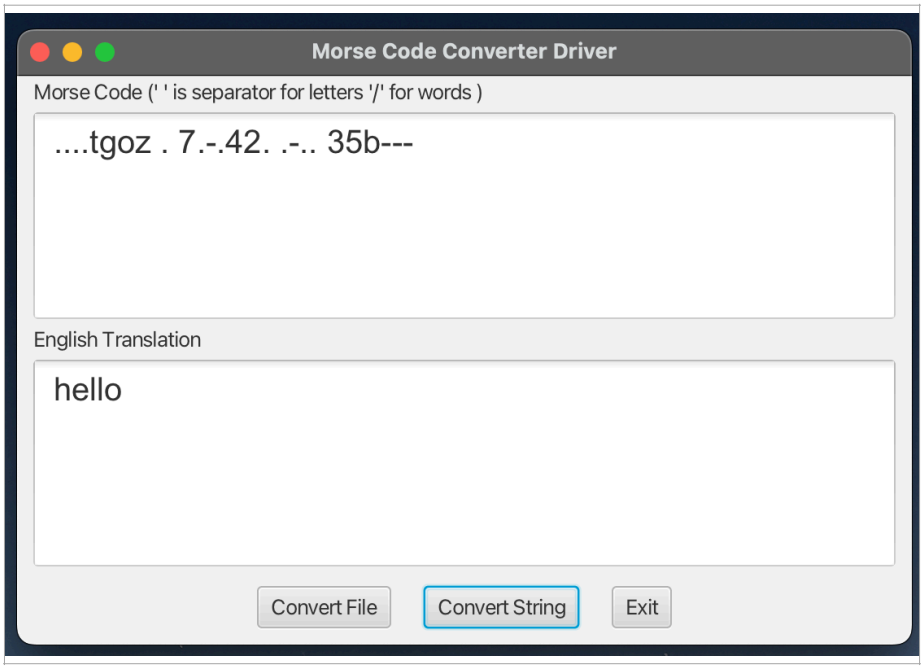
Convert String: The Morse Code for “hello world” is entered and properly translated.



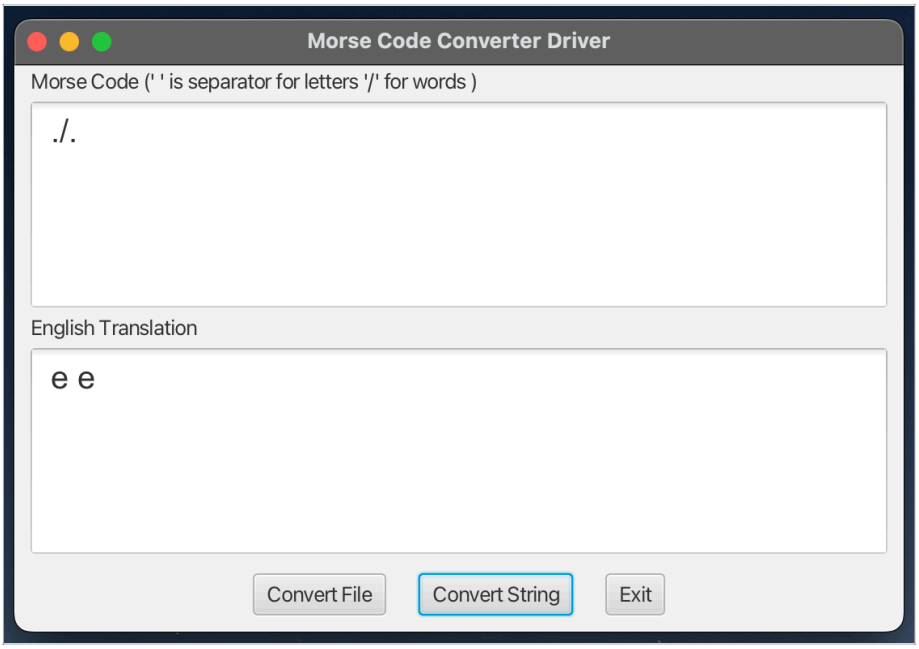
Convert String: The Morse Code for “the quick brown fox jumps over the lazy dog” is entered and properly translated.



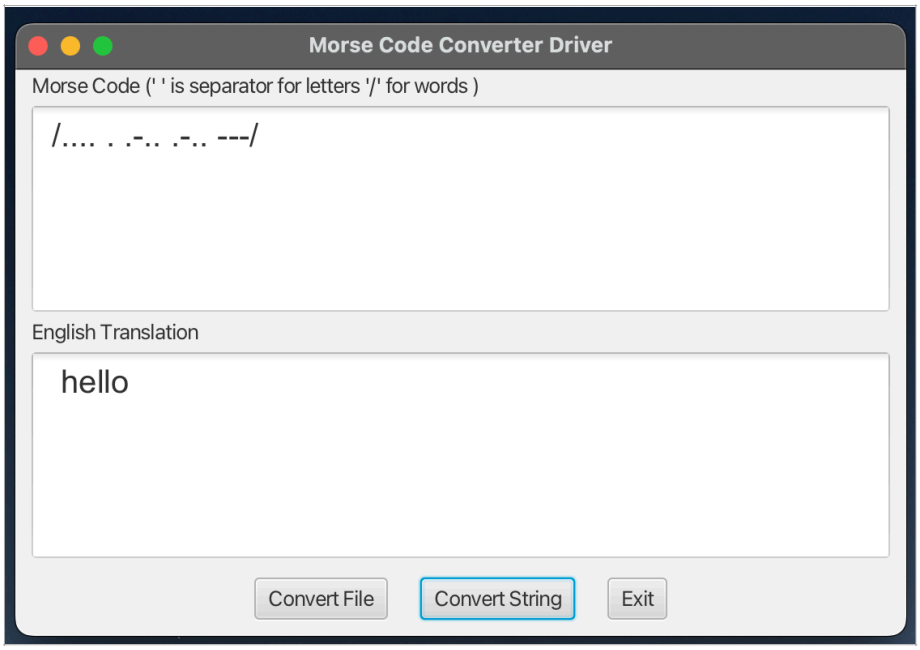
Convert File: The Morse Code for “love looks not with the eyes but with the mind” from the text file “LoveLooksNot.txt” is read and properly translated.



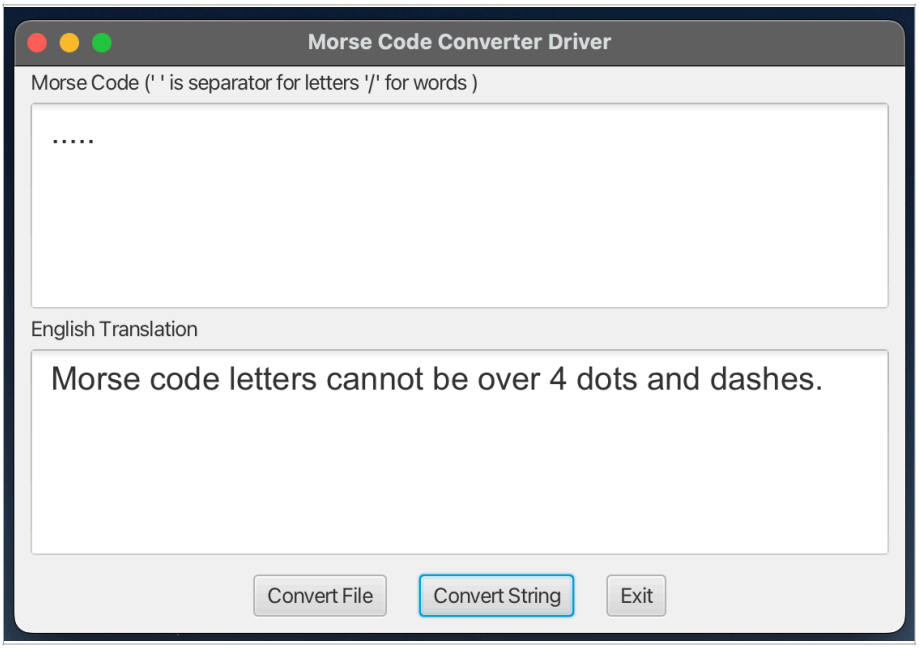
Data Validation: Irrelevant letters and numbers entered into the Morse Code are ignored, even if within the Morse Code letter itself.



Data Validation: Slashes without spaces before or after them do not crash the GUI anymore.



Data Validation: Slashes at the beginning or end of the Morse Code String do not cause the GUI to crash anymore.



Data Validation: Morse Code letters cannot be over 4 dots and dashes, or an Error message will display. The GUI no longer crashes when too-long letters are mistakenly inputted.
